

National University of Computer and Emerging Sciences, Lahore Campus

Course: AI
Program: BS(Computer Science)
Duration: 10 Min
Paper Date: 20-04-17
Section: E
Exam: Quiz 4

Course Code: CS401
Semester: Spring 2017
Total Marks: 5
Weight %
Page(s):
Reg. No

Instruction/Notes:

Question1 (5)

Given that we have a training data containing 6 features $\{x_1, x_2, \dots, x_6\}$ and two outputs $\{y_1, y_2\}$ for certain classification problem. This problem is not linearly separable, however if we transform data into 3D (using some function) it becomes linearly separable.

Draw an Artificial Neural Network architecture for above problem.
